## Houk Marketing is Proud to now offer Cast WYSIWYG software and training!

Feb. 1, 2005

### Techni-Lux now official Authorized WYSIWYG Dealer

Orlando, FL – Techni-Lux, Inc. is the newest dealer of Cast Software's WYSIWYG lighting visualization/rendering software. Customers who have previously looked to Techni-Lux for their services as a WYSIWYG Certified Service Provider and Authorized WYSIWYG Trainer can now also purchase WYSIWYG software itself. Not only is the WYSIWYG software now available from Techni-Lux, but it is also available either bundled into SGM's Regia 2048 consoles or as an added option to ShowCAD Artist PC based show control software.

"This is a really big step for us," says Techni-Lux's resident designer, Tony Hansen. "We're already part of the limited number of AWT's and CSP's in the U.S., and now that we're an official 'WYG dealer we've become a one-stop shop when it comes to Cast Software."

WYSIWYG is currently available for purchase both as the software itself and as an optional feature for SGM Regia 2048 consoles and ShowCAD Artist. An official date is currently being set for standard inclusion of WYSIWYG software in all Regia consoles.

For more information about these exciting developments, contact Tony Hansen at [tony.hansen@techni-lux.com](mailto:tony.hansen@techni-lux.com) .
