SEMINARS:

10:30 AM Protecting the Stage by Richard Cadena

Guest Speaker Richard Cadena, President of Academy of Production Technology, will discuss the causes of faulty grounding, how to recognize them, and how to help prevent electrocutions on the stage. The session is open to people in all levels of live event production and is designed to help elucidate safe practices for stage performers, stage electricians, and technicians.

2:00 PM Why LED Makes Rubber Duckies Evil by Tony Hansen

LED comes with a unique set of rules when using color changing fixtures for illumination. Our seminar is based on a popular magazine article of the same name and has been used in several trade references as a simple manner to explain color theory and how it affects the medium and the final outcome. This is a fun, lighthearted romp thru LED color presented in a way that anyone can understand to provide an awareness of the power and limitations of this new technology.

3:30 PM Panel Discussion: Lighting the Mouse, Wizard and Whale

Moderator Richard Cadena, President of Academy of Production Technology

A panel discussion led by Richard Cadena and featuring our own Tony Hansen who has worked on several award winning attractions around the world. They will be joined by a panel of industry elites from the local theme parks to discuss the unique challenges and opportunities working in this rather exciting genre of lighting and effects! Please join us for this lively discussion and bring your questions for the experts!

CONSOLE INTRODUCTION

2:30 PM and 4:00 PM ChamSys 101: An introduction to the world of Chamsys consoles and their capabilities by Philip Watson

Training for everyone who owns or is interested in ChamSys range of MagicQ products.

TECH TRAINING:

11:00 AM Moving Lights: care and feeding

by Lisa Hansen

This class will go under the hoods of some basic Moving or Intelligent light types. Fixture maintenance, cleaning, lamp care and basic tune ups will be taught. This is a great class for those starting to work with Moving lights and their care.

1:00 PM Basic DMX System by Nathan Rudolf of Interactive Technologies

This beginner class will go over the most basic DMX system planning and layout. There will be a brief introduction to the DMX Protocol, and then an overview of cabling, splitters, pack dimmers and simple controllers.

4:30 PM Conventional Lights: care and set-up

by Lisa Hansen

This class will go over how to maintain and set-up basic conventional light fixtures such as an Ellipsoidal, Fresnel and Par Can. There will be an intro to the workings of each fixture, different lamp types and the trimming of an Ellipsoidal.
