

SmartNode™

The Smart Bridge
for Lighting Control

Interactive
TECHNOLOGIES

SmartNode™

SmartNode combines the concept of a DMX-to-Ethernet converter with the unique flexibility of **Smart Modules** to unleash incredible possibilities for entertainment lighting networks.

Back Panel of 2-Port SmartNode

Build the Perfect Node

Every project is different. **SmartNode** allows you to choose your own connector types, protocols, I/O interfaces, and behaviors.

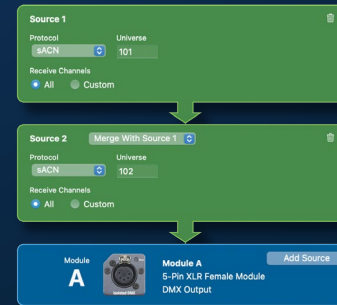

Plays Well with Others

Works great with your favorite lighting console. Works even better with **CueServer**.

Easy Setup

Visualize how data enters and exits each module with simple flowchart-style diagrams.

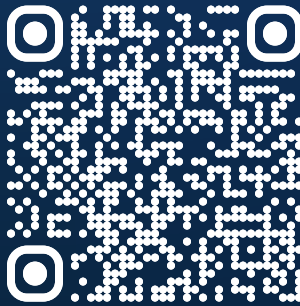

Plenty to Pick From

Smart Modules are available for DMX, Station Bus, Relays, Contact Closures, Digital I/O, Serial, MIDI, and more. Just "plug-in" the modules you need for your project.

(Smart Modules sold separately)
