

Overview

This document is a quick reference for the SceneStation Demo Panel Show. Although this show file is pre-loaded on the SceneStation Demo Panel, it can also be used with any SceneStation. This demo file may be a great starting point for your own projects. The Demo Panel Show is configured to operate up to 40 RGB LED fixtures, and it has a variety of programmed sequences that show off SceneStation's versatility and also the power of SceneStation's built-in effects engine.
